I design accessible, ethical, research-based digital experiences — with a teacher's sense of how people understand, and a love of colour and form. I like making the complex understandable, in healthcare, public services and cultural heritage, and for audiences that are easily forgotten in digital design.

UX PROJECTS

Titra Health — 2026

Brief for Titra Health in collaboration with Karolinska Institutet Innovations AB

Mapped the titration process for ADHD medication from the perspective of patients, parents and schools, through 69 survey responses and 9 in-depth interviews.

> **OUTCOME** A decision basis with a shared information hub as the first recommendation, and healthcare professionals' perspective as the next step.

Freshly — 2026

Individual final assignment, UI design course — brief from an entrepreneur

Took a researcher's low-fidelity wireframes to a finished, reasoned UI design for a grocery delivery service with a ten-minute delivery promise.

> **OUTCOME** Five views and a design system a developer can build an MVP from.

The Viking Museum — 2026

Course project in UX ethics — own prototype

Ethical review of the museum's website across four themes. My individual task was an in-depth analysis of GDPR and Privacy by Design; I designed and built the prototype myself.

> **OUTCOME** A prototype where dark patterns in the cookie banner and ticket flow were designed out.

TV4 Play — 2025

Course project in quantitative methods

Investigated accessibility of live captions for users with visual and hearing impairments. Over 30 quotes were coded in Excel before being themed, and AI was used as a "Red Team" against the group's own assumptions.

> **OUTCOME** A measurable hypothesis about the gap between technical accuracy and perceived quality.

More projects: Meter — home page concept for a health app, built in Framer. Wingspan — usability tests, expert review and guerrilla tests.

EXPERIENCE

Study counsellor & mother-tongue teacher — 2022–2025

City of Sundbyberg

Supported students with varying needs, developing my ability to listen, analyse and understand different audiences. Worked in a structured way with needs analysis and problem-solving in cross-functional teams with teachers and school staff.

Supplemental instruction leader — 2021

Stockholm University

Tutored students online with a focus on active learning. Refined my ability to explain complex information and strengthen users' independence.

Purchasing specialist — 2014–2016

Kvant

Responsible for purchasing and delivery of materials for solar panel production. Coordinated complex flows with a focus on precision and schedules, and minimised risks through needs analysis.

EDUCATION

2025–2027
UX Designer — Nackademin, Solna

User-centred design, research, prototyping and design systems, in project form.

2020–2021
Teacher education (supplementary) — Stockholm University

Led to Swedish teaching certification. Pedagogy, communication and learning methods.

2016–2020
Swedish language — JENSEN Higher Vocational Education

2011–2014
Teacher education — Moscow State Pedagogical University

SKILLS

DESIGN & TOOLS
Figma, FigJam, Miro, prototyping, wireframing, design systems, design handoff

RESEARCH & ANALYSIS
Interviews, survey design, usability testing, think-aloud, expert review, guerrilla testing, affinity mapping, personas

ACCESSIBILITY & ETHICS
WCAG and contrast requirements, Privacy by Design, GDPR, inclusive design decisions

AI IN THE DESIGN PROCESS
Prompt engineering for research, AI as a critical sparring partner, open reporting of AI support

LANGUAGES
Swedish, English, Russian
